

iLLUMA-DRIVE COMMERCIAL APPLICATIONS

iLLUMA-Drive's platform is ideal for both new construction and to retrofit into existing spaces

Aside from the smart control and cost overall savings, there is another feature unique to iLLUMA-Drive's system that makes it a worthwhile investment: it improves the productivity of people using it. Our safe, flicker-free lighting and control technology can improve both the health and productivity of people using it. Studies show that flicker can induce epileptic seizures, headaches, fatigue, eyestrain, blurred vision, migraines, and distraction. The system can be programmed to replicate natural lighting conditions throughout the day and night helping stabilize circadian rhythms. Truly offering Human Centric Lighting – motivation, concentration and performance can be increased in the workplace.

iLLUMA-DRIVE COMMERCIAL APPLICATIONS

Link our CENSE System to our NEO Energy Gateway, adding the battery storage you need, and your business will save money. Store energy when the rates are low and using during the high period. If there is ever a power cut, your lights stay on.

In summary, less expensive to install, less expensive to run and less expensive to maintain!
